MYCOMEDICA

Caring is a promise. And a touch of trust.

ABOUT

MYCOMEDICA

MycoMedica is a pioneering Slovenian company specializing in the organic cultivation and processing of medicinal mushrooms. Carefully selected species, cultivated under strict controlled conditions and processed using methods that preserve their biological value, form the foundation of our products designed to support your pet's balance, vitality, and quality of life - today and well in to the future.

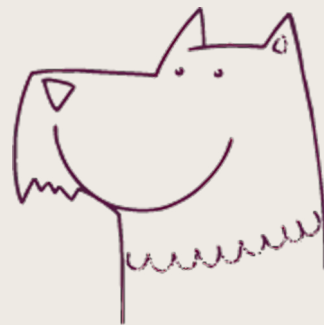

MISSION

MYCOMEDICA

All medicinal mushrooms used in GOBA® products are cultivated in the pristine biosphere of the Julian Alps, with an unwavering focus on purity, traceability, and safety. Certified organic under SI-EKO-001, our products are the culmination of years of dedicated development and collaboration with leading experts in mycotherapy.

We are proud to unveil MycoMedica's new line of pet products for dogs and cats, crafted from a deep respect for nature, rooted in science, and driven by a heartfelt commitment to the well-being of our four-legged friends.

VISION

MYCOMEDICA

At the core of every GOBA® product lies decades of expertise and cutting-edge scientific insights into medicinal mushrooms. We are committed to premium ingredient quality, ensuring safe and effective use, and embracing a responsible, holistic approach to enhancing health and wellbeing.

GOBA® FOR PETS

GOBA FOCUS®

Hericium erinaceus (Lion's mane), often referred to as "Nature's Food for Neurons", is valued for its neuroregenerative and adaptogenic properties. It contains bioactive compounds that support nerve regeneration, stimulate NGF (Nerve Growth Factor) production, and enhance gut microbiota diversity through its natural prebiotic properties.

It is regarded for its rich composition and biological potency, with promising studies supporting its role in neuroprotection and gut microbiome support.

GOBA FOCUS®

The *Hericium erinaceus*-based product is designed to support cognitive functions, as well as the nervous system and digestive health of your pets.

GOBA FOCUS® is recommended for:

- puppies and kittens in their learning and socialization phase,
- adult pets showing signs of cognitive dysfunction, memory decline, or disorientation,
- pets in need of digestive system support.

GOBA GUARD®

Ganoderma lucidum also known as Reishi or the “Mushroom of Immortality”, is one of the most thoroughly researched medicinal fungi for its role in immune system support. It contains over 400 bioactive compounds, including triterpenes, polysaccharides, sterols, fatty acids, and proteins.

Scientific studies have shown that its polysaccharides and triterpenes in particular play a key role in modulating immune function. With centuries of traditional use and strong modern science validation, Ganoderma remains one of the most valued medicinal mushrooms in the world.

GOBA GUARD®

Ganoderma, one of the most revered adaptogenic mushrooms, helps the body restore balance during increased physical, emotional, or environmental stress.

GOBA GUARD® is formulated to:

- strengthen pets' immune resilience,
- ease seasonal or chronic allergies,
- support body's natural detox pathways,
- protect the liver from the side effects of antibiotics, tick preventives, and deworming treatments.

GOBA ACTIVE®

Cordyceps is one of nature's rarest and most treasured fungi. Wild harvested specimens are so highly valued for their unique properties and scarcity that they can reach prices up to 50.000 €/kg. Rich in bioactive compounds - including polysaccharides, cordycepin and more - Cordyceps has long captured the attention of traditional healers and modern scientists alike.

At MycoMedica, we are proud to be among the few in the world who have successfully developed advanced, certified organic cultivation methods for Cordyceps.

GOBA ACTIVE®

Cordyceps promotes vitality, endurance and recovery. It enhances blood circulation, improves cellular oxygen utilization, and boosts mitochondrial energy output.

GOBA ACTIVE® is recommended for:

- active and athletic pets,
- older animals experiencing fatigue or loss of stamina,
- animals showing signs of low mood or anxiety,
- support of appetite, reproductive vitality, fertility.

GOBA VITAL®

Ganoderma lucidum, known as the “Mushroom of Immortality” supports detoxification and helps protect and regenerate the liver.

Cordyceps praised as the “Himalayan Gold”, enhances strength, stamina and recovery.

Grifola frondosa or “Maitake” helps regulate metabolism and strengthen immune response.

Lentinula edodes (Shiitake) often called the “Elixir of Life” promotes vitality and natural resilience.

Agaricus blazei, the “Mushroom of the Sun” offers antioxidant protection and supports immunity with anti-inflammatory and adaptogenic effects.

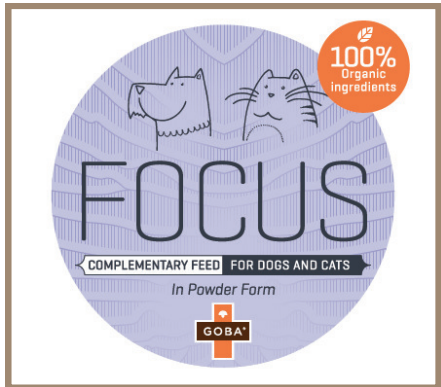

GOBA VITAL®

A premium blend of 5 medicinal mushrooms with adaptogenic properties, crafted to our own formulation.

GOBA VITAL® supports your pet's overall vitality by helping to:

- activate immune response,
- regulate metabolic processes,
- boost energy, stamina, and recovery,
- aid digestion and support liver health,
- balance the body's stress response.

is born. We are proud that more and
more pet owners trust our GOBA®
products – and their pets truly feel
the difference.**

**TRUST. PROVEN BY
EXPERIENCE.**

"GOBA® Products Made a Real Difference for Our Dog's Allergies."

I mixed GOBA GUARD® powder with water to make a paste, rubbed it into my 5-year-old Chihuahua's skin, let it absorb for 20 minutes, then washed him. I did this daily for about a month, after which the scars started falling off and the skin began healing. Now, he no longer itches. I'm satisfied so far, as the sores haven't returned in 3 months - previously they appeared every other month. - Adnan B.

" Natural and Effective Products"

Our nearly 10-year-old cat Max showed changes after his first dose of GOBA VITAL® sprinkled on his food. He became more lively and playful, and his digestion improved - which was a big relief since he's prone to constipation. Being both allergic and diabetic (on a minimal twice-daily insulin dose), maintaining a healthy immune system is especially important for him. - M. Faletič

"I Sincerely Recommend GOBA® Products to All Pet Owners"

For a months, I gave my dogs GOBA VITAL® as directed, adding GOBA ACTIVE® during intense physical activity. After just two weeks, they were more focused and less tired during agility training. - Simona M.

"We Helped our Cat Franci Achieve a Good Quality of Life"

Six months ago, Franci was diagnosed with malignant lymphoma. His prognosis was poor - without chemotherapy, just a month or two; with chemo, maybe six months after treatment. We decided to support his immune system with GOBA VITAL® medicinal mushrooms. The results have been remarkable. Franci is eating well, lively, and playful. His serious illness shows no signs in his behavior or appearance. - Iva S.
